

Continuity Career Continuation Program

Take your career to the next level

Firestorm People Solutions Continuity Career Continuation program assists professionals through the full career search, on-boarding and career growth process through the support of expert Career Mentors. Our Career Tree approach adapts to all levels of professional, regardless of where they are in their career – from entry-level to executive management.

The program kicks-off with an initial Competency and Culture Assessment to assess a candidate's preferred work culture preference in combination with skills and abilities to determine the overall best fit. This is followed by an individual Assessment review to design the career roadmap next steps.

The program also includes Compensation assessment, Certification guidance in providing an assessment on which certification(s) make the most sense for the individual's career path, web-based career coaching presentations held periodically throughout the year, and social media profile assessment and direction guidance, to ensure the right message is being communicated.
